PROFESSIONAL SUMMARY

Junior Full Stack Developer and Fresh Graduate with **freelance development experience since 2022**, building responsive web applications and database-driven systems for clients. I have **hands-on experience** with **JavaScript, React, Node.js, Express, SQL, HTML, CSS, and Git, with working knowledge of Java, PHP, and Python.** Developed **full-stack applications including business management, scheduling, POS, and inventory systems,** contributing to both **frontend** and **backend** development. **Eager to strengthen technical skills**, **write clean** and **maintainable code**, .**solve real-world problems**, and grow as a fullstack developer

TECHNICAL SKILLS

- **Programming Languages:** Java (OOP, GUI with Swing), JavaScript (ES6+), PHP, Python
- **Backend:** Node.js (Express), PHP, Python (Django Framework)
- **Frontend:** HTML, CSS, Javascript, Electron.js, Bootstrap / Tailwind CSS
- **Architecture:** REST API Architecture, MVC Pattern, Relational Database Design, Modular CRUD System Design
- **Database:** MySQL, SQlite, MongoDB
- **Developer Tools & Platform:** Apache, Git/GitHub, Vercel, Railway, Ngrok, Hostinger, GoDaddy, Namecheap
- **Specialized:** Business Management Systems Development (Inventory, POS, Quotation Systems), Full-Stack CRUD Application Development, Database-Driven Application Design, Workflow & Data Modeling fo Small-to-Medium Business Systems

---

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer | Self-Employed | August 2022 - March 2026

Technologies Used: MySQL, HTML, CSS, JavaScript, PHP, MySQL, MongoDB, Python, Java with Swing, Electron.js, Bootstrap, NameCheap, GoDaddy

- Full-Stack Business Management System (Capstone Project | Collaborative Development) | *January 2026 - March 2026*
  - Contributed to the development of a full-stack business management system as part of a capstone team project
  - Implemented modules such as CRUD operations, database design, and system workflows
  - Collaborated in refining and revising system features based on project requirements and advisor feedback

- Library Inventory & Analytics System - Electron-Based QR Inventory| *January 2026 - March 2026*
  - Built an Electron-based desktop inventory system for managing academic library resources
  - Integrated QR code functionality for fast book tracking and borrowing management
  - Developed analytics dashboard displaying borrowed / unborrowed books, categories, and total inventory statistics
- AI-Assisted Educational Test Generation System | *June 2025 - October 2025*
  - Developed an AI-assisted system that generates exam questions based on Bloom's Taxonomy levels
  - Designed logic for analyzing educational content and structuring question outputs dynamically
  - Built system to support automated test creation for academic use cases

---

TRAINING EXPERIENCE

Global Payments Academy Graduate | Global Payments | September 2026

- Gained an understanding of various departments, their functions, and .how teams collaborate across the organization
- Learned key concepts in payments, merchant services, card operations, disputes, risk management, and customer and technical .support
- Developed professional communication, problem-solving, and business process knowledge through structured industry training

IT Intern | Philippine Malabon Cultural Institute, Inc. | January 2026 - March 2026

- Developed and deployed a full-stack Library Management System (LMS) with CRUD operations, QR-based tracking, reporting .dashboards, and backup/recovery features
- Designed and optimized UI/UX and ensured reliable frontend–backend .data flow through testing, debugging, and performance improvements
- Provided IT support including network configuration, software installation, and hardware/software troubleshooting to maintain system .and operational efficiency

---

EDUCATION

Bachelor of Science in Information and Technology City of Malabon University - Malabon | Magna Cum Laude | *Graduated on June 2026*
