PROFESSIONAL SUMMARY

Junior Software Developer and IT graduate with freelance development experience since 2022. Experienced in building **responsive web applications, database-driven systems, and business management solutions. Familiar with JavaScript, React, Node.js, Express, SQL, HTML, and CSS, with additional knowledge of Java, PHP, and Python.** Interested in developing practical software solutions while continuously improving technical skills.

TECHNICAL SKILLS

- **Programming Languages:** Java (OOP, GUI with Swing), JavaScript (ES6+), PHP, Python
- **Backend:** Node.js (Express), PHP, Python (Django Framework)
- **Frontend:** HTML, CSS, JavaScript, Electron.js, Bootstrap / Tailwind CSS
- **Architecture:** REST API Architecture, MVC Pattern, Relational Database Design, Modular CRUD System Design
- **Database:** MySQL, SQLite, MongoDB
- **Developer Tools & Platform:** Apache, Git/GitHub, Vercel, Railway, Ngrok, Hostinger, GoDaddy, Namecheap
- **Specialized:** Business Management Systems Development (Inventory, POS, Quotation Systems), Full-Stack CRUD Application Development, Database-Driven Application Design, Workflow & Data Modeling for Small-to-Medium Business Systems.

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer | Self-Employed | August 2022 - March 2026
Technologies Used: HTML, CSS, JavaScript, PHP, MySQL, MongoDB, Python Electron.js, Bootstrap, NameCheap, GoDaddy

- **Full-Stack Business Management System (Capstone Project | Collaborative Development) | *January 2026 - March 2026***
  - Contributed to the development of a full-stack business management system as part of a capstone team project
  - Implemented modules such as CRUD operations, database design, and system workflows
  - Collaborated in refining and revising system features based on project requirements and advisor feedback
- **Library Inventory & Analytics System - Electron-Based QR Inventory | *January 2026 - March 2026***
  - Built an Electron-based desktop inventory system for managing academic library resources
  - Integrated QR code functionality for fast book tracking and borrowing management
  - Developed analytics dashboard displaying borrowed / unborrowed books, categories, and total inventory statistics

- **AI-Assisted Educational Test Generation System | *June 2025 - October 2025***
  - Developed an AI-assisted system that generates exam questions based on Bloom's Taxonomy levels
  - Designed logic for analyzing educational content and structuring question outputs dynamically
  - Built system to support automated test creation for academic use cases

IT Intern | Philippine Malabon Cultural Institute, Inc. | January 2026 - March 2026

- Developed and deployed a full-stack Library Management System (LMS) with CRUD operations, QR-based tracking, reporting dashboards, and backup/recovery features.
- Designed and optimized UI/UX and ensured reliable frontend–backend data flow through testing, debugging, and performance improvements.
- Provided IT support including network configuration, software installation, and hardware/software troubleshooting to maintain system and operational efficiency.

TRAINING EXPERIENCE

Global Payments Academy Graduate | Global Payments | September 2026

- Gained an understanding of various departments, their functions, and how teams collaborate across the organization.
- Learned key concepts in payments, merchant services, card operations, disputes, risk management, and customer and technical support.
- Developed professional communication, problem-solving, and business process knowledge through structured industry training

EDUCATION

Bachelor of Science in Information Technology City of Malabon University - Malabon | Magna Cum Laude | *Graduated on June 2026*
